CertaUPS

IoT FUNCTIONALITY

IOT FUNCTIONALITY

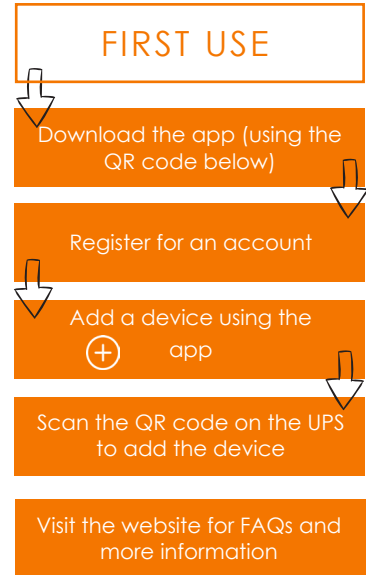

Drawing on the latest in UPS technology, the new product portfolio* from CertaUPS has been built to include leading IoT capabilities. By the simple download of an App, the CertaUPS UPS systems can be easily monitored in real time with testing and maintenance scheduling at your finger tips.

Simply connect an Ethernet cable or optional Wi-Fi adapter, download the App and connect your UPS to the secure cloud-based platform.

The App allows you to rename the UPS systems & add them to a custom site for easy identification. Maintenance personnel can also be added to the site to allow for rapid response to an event. Notifications can be delivered via push or e-mail and be configured to notify you about all events or just critical events.

THE BENEFITS

- Monitor single or multiple CertaUPS UPS systems in one App.
- Free to install with no licensing costs
- No complicated software
- Secure cloud connection based on Microsoft Azure
- Limitless centralised monitoring of multiple CertaUPS UPS systems
- Group UPS by site and invite others to view the device status
- Real time monitoring
- Schedule testing
- Easy management from a mobile phone
- Push notifications

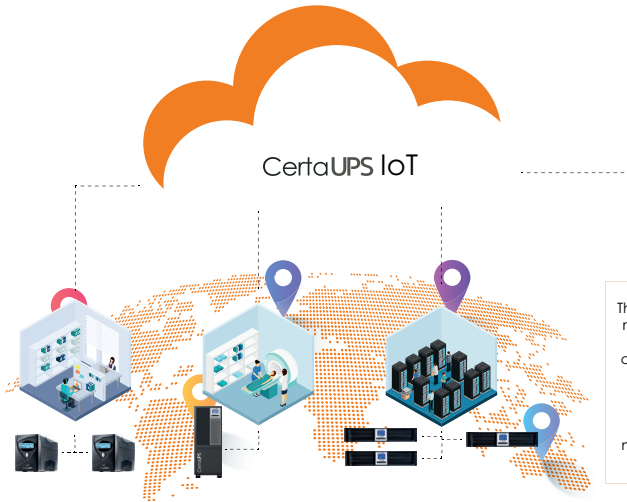

*Compatible with the C450R, C650, C650R, C750, C750R

OUT OF THE BOX CONNECTIVITY

INTELLIGENT UPS MONITORING

Operators often want UPS systems to be integrated into their facility network as attached devices, just like the rapidly growing number of other attached Internet of Things (IOT) devices. This allows higher volumes of data to be moved in real time between any number of UPS systems and other equipment, even if they are distributed across a large site or even around the world.

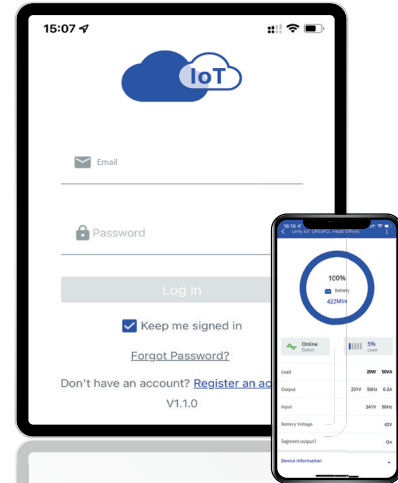

The CertUPS IoT solution requires no additional software and no centralised monitoring station.

Limitless UPS across multiple sites can be monitored simply from a smart phone

THE PERFECT PAIRING

When considering UPS system for your infrastructure whether that's supporting multiple data racks or even remote locations, it's a comfort knowing that your UPS are providing the necessary critical power protection. CertUPS IoT functionality provides the ability to monitor the status of your CertUPS across multiple locations using one App, providing the peace of mind no matter what your location.
